

LI-ION BATTERY CHARGING & STORAGE SYSTEM

THE SYSTEM

Engineered to safely store various types, sizes, and shapes of Lithium-Ion batteries. Certified to contain battery fires and protect adjacent batteries, it setting the standard for safety and reliability

PERFORMANCE HIGHLIGHTS

Qualified with impressive test results

- Successfully handled 220% more heat flux than typically generated under extreme conditions
- Temperatures in adjacent compartments 80% below the maximum allowable temperature.
- The cabinet remained cool to the touch.
- Fully operational post-test performance.
