ORDER FULFILLMENT

PAR's experience handling a variety of form factors of goods extends to storage and retrieval of uniquely-shaped and fragile goods making them a critical solution provider for all your order fulfillment needs. Order fulfillment stations work well for brick-and-mortar retail facilities, e-commerce distribution centers, and inventory management in healthcare facilities.

THE BENEFITS OF PAR'S ORDER FULFILLMENT SOLUTIONS

- Have freed up over 1,000 square feet (92.9 square meters) of store floor space
- Improve traceability of product distribution
- Track, manage and restock over 18,000 SKUS products of varying sizes and shapes
- Real-time inventory tracking for product management
- Real estate efficiency: Vertically integrated modular design that can expand in height and width, storing over 18,000 items vertically
- Speed of delivery: Customers have access to each item in under a minute to save time searching for the item
- Unmanned robotic system: Empowers customers to buy products originally under lock and key without assistance of an employee
- Allows customers to review buying trends, so it is always stocked with the most current and relevant items
