

NAVAL CLOSURE SYSTEMS

KEY CHARACTERISTICS

- Lightweight
- Customizable In-Situ
- Modular
- Sustainable
- Eco-Friendly

VARIANTS AND CAPABILITIES

- Watertight
- Gastight
- Weatherproof
- Fire Rated
- Shock Rated

LIGHTWEIGHT** NAVAL CLOSURE SYSTEMS

Our Lightweight** Naval Closure Systems are fully modular, eliminating the need for multiple configurations onboard vessels and reducing both NRE and options are available with interchangeable accessories, reducing spare stock levels and costs.

* Details and certifications tailored to meet customer requirements

**Up to 40% weight saving compared to comparable market products.

OPTIONS INCLUDE

- Personnel, Dead Light, Fixed Light, No Light, or Fisheye Viewer options without the need for bespoke panels.
- Air test requirements, if needed, can be met with a simple part interchange.
- Changing the handing of the closure from L/R to R/L is quick and easy by repositioning the hinge and handle components while the closure remains in-situ.
- Integrated single-point mechanism allows repositioning of the handle shaft with minimal effort, maintaining full functionality without additional labor-intensive and complex settings.
- Hard-resistant smooth surface finish eliminates the need for painting, though paint can be applied to meet customer requirements if needed.
- Fire integrity is maintained with our lightweight closure system incorporating COMFIRE® passive fire protection compound via an in-situ add-on arrangement.

COMFIRE® is a non-combustible, non-carcinogenic, non-toxic, sustainable, and environmentally friendly product already in service, offering up to A60/N30 fire-rated protection in several naval applications.
